Local area SEND report

This report presents the statistics on SEND available for Southwark, compared to your selected comparison group of Inner London. This should help to assess how well arrangements since the reforms are working and compare delivery across local areas.

The aim is to bring local area SEND data into one place, providing an evidence base that can be a starting point for conversations at a local and national level on progress and priorities.

However, this is not a checklist against which local areas should measure performance. These statistics tell only part of the story, and what makes a successful outcome will vary hugely for individual children and young people.

Much of the information below is education-focused - this is because most of the data available currently relates to education. The Department for Education is working with the Department of Health to link data from their Children and Young People’s Health Services Data Set to the national pupil database, as this will increase health data for SEND pupils significantly. We hope to add this data to this report once available.

Report Contents:
- Local area SEND information
- Implementation of the reforms
- Attainment of pupils with SEN
- Preparation for adulthood
- Experience of the system

The metrics below are those available at a local authority level currently, which relate to SEND. If there are other metrics which meet this criteria that you think would improve the report, or you have any other feedback on how we could improve the report, please contact us by emailing send.research@education.gsi.gov.uk.

The data in the metrics below will update automatically each time the latest data is published. If any values are missing from the database a ‘no value’ will appear, this is because a figure was not available from published sources. Please use the feedback form: http://lginform.local.gov.uk/feedback if you have any technical queries regarding the report or the data collections used.

Local area SEND information

In Southwark 16.7% of pupils have a have a statutory plan of SEN (statement or EHC plan) or are receiving SEN support (previously school action and school action plus). This compares to an average of 15.7% across Inner London. NB these figures, and those in the first three charts below, are for pupils attending schools in Southwark. They do not include children and young people for whom Southwark is responsible but has placed out of borough.

**Looked after children and children in need**

Looked after children are defined as those looked after by the local authority for one day or more. In Southwark, 32.8% of looked after children are on SEN support, compared to 35.6% in Inner London. 32.4% of looked after children in Southwark have a statement of SEN or EHCP, compared to 32.3% in Inner London.

**Children in need**

Children in need are defined in law as children who need local authority services to achieve or maintain a reasonable standard of health or development, need local authority services to prevent significant or further harm to health or development, or are disabled.

In Inner London, 28.3% of Children in Need are on SEN support and 20.0% have a statement of SEN or EHC plan. In Southwark, 31.6% of children in need are on SEN support and 12.8% of children in need have a statement of SEN or EHC plan.

Primary Need

A child or young person has SEN if they have a learning difficulty or disability which calls for special educational provision to be made for them. All pupils with SEN have an assessment of their primary need. The following charts show the breakdown of need in Southwark by primary, secondary and special school, compared to the national averages and ranked by prevalence.

**Primary need in primary schools**

- % of SEN pupils with primary need: speech, language and communications needs (Primary)
- % of SEN pupils with primary need: moderate learning difficulty (Primary)
- % of SEN pupils with primary need: social, emotional and mental health (Primary)

The chart above shows the type of schools pupils with statements or EHC plans have been placed in by Southwark, compared to national averages and ranked by frequency.
**Reported expenditure**

The metrics below show the reported expenditure on SEN in Southwark. This figure is based on the total reported weekly expenditure on SEN by the local authority, divided by the number of pupils with statements or EHC plans. In Southwark, this figure is £125 per week per child, in the previous period it was £85; this compares to the average for Inner London of £122.

---

### Weekly expenditure per child with statement/plan (from 2011/12 to 2014/15)

![Weekly expenditure per child with statement/plan](image)

**Source:**
- **Metric ID:** 3440, Department for Education, LAIT

Councils also provide respite for disabled children aged 0-17. In Southwark, planned spend in the most recent period was £21.15 per child, compared to £9.42 in the previous period; in Inner London, the average is £24.12 per child, a decrease since the previous period (£25.72). This figure is calculated by taking the local area’s planned expenditure on short breaks and dividing this by the number of 0-17 year olds in the LA.

Implementation of the reforms

The 2014 Act introduced the biggest reforms to SEND in a generation, aimed at making the system less confrontational, promoting better involvement of parents and increasing focus on outcomes and transition to adult life.

An important part of these reforms was the move from statements of SEN to more holistic education, health and care (EHC) plans. EHC plans will ensure that a young person’s needs are assessed in a coherent way across education, health and social care services. They can remain in place from birth to the age of 25 and have a clear focus on outcomes, including the support a young person will need to achieve them. EHC plans must be produced by the local area in partnership with parents, children and young people and based on a co-ordinated approach to the delivery of services across education, health and care, supported by a duty to plan and commission services jointly.

Local areas have until April 2018 to complete transition to the new system, and every local authority has published an individual local transition plan setting out the timings for transfers to the new system.

In the most recent period, 16.2% of children and young people with statements in Southwark have been issued with an EHC plan, compared with an average of 15.7% for Inner London.

Meeting statutory timelines

It is in the interests of all those concerned that EHC needs assessments are carried out in a timely manner. Regulations set out that the overall time it takes from the local authority receiving a request for an assessment and the final EHC plan being issued (if one is required) should be no longer than 20 weeks. In Southwark, 38.6% were issued within 20 weeks, excluding exceptional cases where LAs are allowed to exceed the 20 week time limit, compared to the Inner London average of 72.6%.
Discontinued statements

It is expected that all those who have a statement and who would have continued to have one under the current system, will be transferred to an EHC plan – no-one should lose their statement and not have it replaced with an EHC plan simply because the system is changing. The following chart shows the number of children with statements who the local authority has assessed as not requiring an EHC plan. In Southwark, this decision was made for 0 statements, compared to the Inner London average of 7.

No. of children and young people (0-25) with statements assessed and no EHC plan issued (assessments) (2015/16 (academic))

Source:
Metric ID: 4740, Department for Education, Statements of SEN and EHC plans England

Personal budgets

The reforms enabled greater personalisation of support through the use of a personal budget to provide children and young people with real choice and control over the design of their care and education package. The personal SEN budget is a sum of money made available by the local authority, at the request of a parent or young person, if it is clear that without this additional (top-up) funding, it will not be possible to meet the child’s learning needs. In Southwark, Suppressed have taken up personal budgets, compared to the Inner London average of 8. Please note that where values have been suppressed, this means that the number of pupils is too low to be published.

No. of personal budgets taken up for EHC plans issued & transferred or reviewed (2015)

Source:

Attainment of pupils with SEN

The Early Years Foundation Stage Profile (EYFSP) is a teacher assessment of a child’s development at the end of the academic year in which they turn five. 5.0% of children with statements of SEN or EHC plans and 25.0% of children on SEN support in Southwark achieve a good level of development, defined as achieving in 7 areas of learning covering 17 early learning goals. This compares to an Inner London average of 6.8% for children with statements of SEN or EHC plans and 29.6% for children on SEN support.

Please note that where values are not displayed, this is a result of them being suppressed, which means that the number of pupils is too low to be published.

**Phonics**

The phonics approach teaches children to decode words by sound, rather than recognising whole words. The phonics screening check is designed to confirm whether pupils have learnt phonic decoding to an appropriate standard. In Southwark, 53% of pupils with SEN Support are meeting the expected standard of phonic decoding, compared to a Inner London average of 54%. 23% of pupils with statements in Southwark meet the standard, compared to 28% in Inner London.

![graph](image)

- Metric ID: 4668, Department for Education, Phonics screening check and key stage 1 assessments: England

**Key Stage 2**

All children in state funded primary schools are required to take part in key stage 2 national curriculum assessments before they move to secondary school. Pupils are expected to achieve level 4 by the end of key stage 2, and to make at least two levels of progress between key stage 1 and key stage 2. The tests are designed to show what pupils have achieved in selected parts of a subject at the end of each key stage.

12% of pupils with statements of SEN or EHC plans and 61% of pupils on SEN support in Southwark achieve a level 4 or above in reading, writing and mathematics at KS2. For pupils with statements, this is worse than the previous period (19%) and for pupils with SEN support this is an improvement on the previous period (56%). This compares an Inner London average of 21% for pupils with statements of SEN or EHC plans, and 59% for pupils on SEN support. The third chart in this series shows attainment for children with no SEN, which stands at 91% in Southwark and 94% in Inner London.

Preparation for adulthood

The reforms placed increased emphasis on supporting children and young people with SEND to make a positive transition to adulthood, including paths to employment, good adult health, independent living and participating in society. For more information visit http://www.preparingforadulthood.org.uk/.

This first chart below shows the percentage of the Key Stage 4 SEN cohort in a sustained education, employment or training destination at 17. To be included in the measure, young people have to show sustained participation in education, training or employment destinations in all of the first two terms of the year after they completed key stage 4. In Southwark, 86% of the KS4 cohort with a statement were in education, employment or training at 17, this compares to the previous period of 98% and the Inner London average of 90%. Of those without a statement 88% were in education, employment or training at 17. 87% were in education, employment or training at 17 in Inner London.

Source:
Metric ID: 4689, Department for Education, Destinations of key stage 4 and key stage 5 pupils
Key Stage 5

Key Stage 5 is the period of education covering pupils aged 16-18. The next chart shows the percentage of the Key Stage 5 SEND cohort in a sustained education, employment or training destination in the first two terms of the year after they completed A-level or other level 3 qualifications. This is 81% in Southwark, which compares to 68% in the previous period, and the Inner London average of 78%.
Level 2

Attainment of Level 2 equates to achievement of 5 or more GCSEs at grades A*-C or a Level 2 vocational qualification of equivalent size. The next chart shows that the percentage of the SEN cohort studying in Southwark at the age of 16 (academic age 15) who attain a Level 2 qualification, including English and Maths, by the age of 19, is 47.3%, compared to an average of 48.8% across Inner London. This compares to those with statement of which 14.3% attained a Level 2 qualification, including English and Maths in Southwark and 16.0% in Inner London.

Source:
Metric ID: 4672, Department for Education, Level 2 and 3 attainment by young people aged 19
Level 3

Attainment of Level 3 equates to achievement of 2 or more A-levels or equivalent qualifications. The following chart shows the percentage of the SEN cohort studying in Southwark at the age of 16 (academic age 15) who attain a level 3 by the age of 19 is 44.6% for those with SEN support and 15.2% for those with a statement or EHCP.

Settled accommodation

Settled accommodation refers to secure, medium to long term accommodation. Non-settled accommodation refers to accommodation arrangements that are precarious, or where the person has no or low security of tenure/residence in their usual accommodation and so may be required to leave at very short notice. In Southwark, 60.5% of adults defined as 18-65 year olds with learning disabilities are in settled accommodation, compared to 29.3% in the last period and the Inner London average of 61.9%.

Metric ID: 1095, Health and Social Care Information Centre, Measures from the Adult Social Care Outcomes Framework, England
Experience of the system

A central aim of the reforms was to ensure that the experience of gaining support was positive for children, young people and their families.

If a child’s parent or the young person is dissatisfied with their EHC needs assessment or plan, they can appeal to the First-tier (SEN and Disability) Tribunal. The tribunal hears appeals against decisions made by the local authorities.

Mediation is when an impartial person, who is trained to deal with two opposing sides, acts as a referee in a dispute. Effective mediation provides a cost effective alternative in resolving disputes between parents, young people, health services and/or local authorities concerning the provision made for children with SEND.

The number of mediation cases held in Southwark was 10, and the proportion that went on to appeal was Suppressed%. There were 5.4 registered appeals to the SEND tribunal per 10,000 of its school population. This compares to the average for Inner London of 6.0 per 10,000.

**Absence**

Persistent absentees are defined as pupils who have missed 15% or more of school sessions through authorised or unauthorised absence. In Southwark 10.3% of pupils with statements or plans were persistent absentees.

7.0% of sessions were missed due to overall absence from schools for SEN pupils with a statement or EHC plan, the Inner London average was 7.2%. A session is defined as half a day – morning or afternoon. Overall absence is the total number of overall absence sessions as a percentage of the total number of possible sessions available to that enrolment.

**SEN pupils with a statement defined as persistent absentees as a % of the school population (from 2011/12 (academic) to 2013/14 (academic))**

**Source:**
Metric ID: 4727, Department for Education, Permanent and Fixed Period Exclusions from Schools in England
% of sessions missed due to overall absence from schools for SEN pupils 2013/14 (academic)

Exclusion

Fixed period exclusion refers to a pupil who is excluded from a school for a set period of time. A fixed period exclusion can involve a part of the school day and it does not have to be for a continuous period. A pupil may be excluded for one or more fixed periods up to a maximum of 45 school days in a single academic year.

In Southwark, the rate of fixed term exclusions for SEN pupils - calculated by taking the number of fixed term exclusions for SEN pupils and dividing it by the total number of SEN pupils in the LA - was 22.62%. This compares to an average of 12.38% in Inner London.
A permanent exclusion refers to a pupil who is excluded and has their name removed from the school register. Such a pupil would then be educated at another school or via some other form of provision.

In Southwark the permanent exclusion rates for SEN pupils with a statement was Suppressed, compared to the previous period when it was a rate of 0.00%. In Inner London the rate is 0.00%, which has remained the same as since the previous period (0.00%).

Please note that where values are not displayed, this is a result of them being suppressed, which means that the number of pupils is too low to be published.
